

HACKERSAFE® Certification

Clareity Security provides hands-on proactive support along with ScanAlert's leading world class computer vulnerability scanning and HACKER SAFE® and PCI (Payment Card Industry) certifications to help the real estate industry provide the kind of confidence that members and consumers are starting to demand of those to whom they provide their personal or financial information. The HACKER SAFE certification mark is displayed on over 75,000 web sites worldwide. ScanAlert is the vulnerability scanning partner for VISA and PayPal, and the HACKER SAFE certification is seen on sites such as the American Red Cross, GMC, Toshiba, and SONY.

This base service includes *daily* and on-demand scans of two computers, one of which could be certified HACKER SAFE, as well as quarterly scans of five computers. All of these computers could qualify for PCI compliance. The service includes daily scheduled monitoring, vulnerability alerts, web-based reporting access, and full vulnerability remediation support via telephone, web and email from Clareity Security and from ScanAlert's CISSP and CCSP certified security specialists.

The List Price for the scanning service is \$1890/year, but for a limited time Clareity Security is offering it for \$1495/year, or \$2,690 for two (2) years. Please send this completed form and payment to Clareity Security at 13628 W. 95th Street, Lenexa, KS 66215.

Organization Name: _____ Organization Phone: _____

Your Name: _____ Title: _____ Email: _____

Billing Address: _____
